DETAILED ACTION

- * The Examiner has considered the Applicants' IDS of 02-27 & 05-03-2004 and 09-07-2005.
- * Pursuant to 35 USC 131, **Claims 1-33** are presented for examination.

Claim Rejections - 35 USC § 101

0. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

- 0.1 **Claim 13** is rejected under 35 U.S.C. 101 as claiming nonstatutory subject matter because medium can also be of transmission type as per page 47 para. 103 of Applicants' specification.

Double Patenting (non-statutory)

1. The non-statutory double patenting rejection, whether of the obviousness-type or non-obviousness-type, is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent. In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969); In re Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); In re Van Omum, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); In re Longi, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985) and In re Goodman, 29 USPQ2d 2010 (Fed. Cir. 1993).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(b) and may be used to overcome an actual or provisional rejection based on a non-statutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.78(d).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

- 1.1 Instant claimed invention is not patentably distinct from patented claimed invention of USPN 6963622 although the conflicting claims are not identical.

1.1.1 For example: patented **Claim(s) 16** contain(s) every element of **instant claim(s) 1** because the triangular matrix arrangement is equivalent to information organized in tabular form, and as such anticipate(s) **claim(s) 1** of instant application.

1.1.2 “A later patent claim is not patentably distinct from an earlier patent claim if the later claim is obvious over, or **anticipated by**, the earlier claim. In re Longi, 759 F.2d at 896, 225 USPQ at 651 (affirming a holding of obviousness-type double patenting because the claims at issue were obvious over claims in four prior art patents); In re Berg, 140 F.3d at 1437, 46 USPQ2d at 1233 (Fed. Cir. 1998) (affirming a holding of obviousness-type double patenting where a patent application claim to a genus is anticipated by a patent claim to a species within that genus). “ **ELI LILLY AND COMPANY v BARR LABORATORIES, INC.**, United States Court of Appeals for the Federal Circuit, ON PETITION FOR REHEARING EN BANC (DECIDED: May 30, 2001).

1.2 This is a provisional obviousness-type double patenting.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2.1 Claims **1-10, 13-33** are rejected under 35 U.S.C. 102(a) as being anticipated by **Echard et al.** (*The Π -Rotation Low-Density Parity Check Codes*, IEEE, 29 Nov. 2001) of IDS of 05-03-2004.

As per Claims 1-10, 13-33, Echard et al. discloses equivalent procedure for generating LDPC codes by arranging low density parity check matrix in triangular form or diagonal pattern wherein, e.g., Equation 1 depicts occurrences of one values are set as Applicant's embodiment of Fig. 6.

Echard et al. discloses equivalent cyclic shifting approach on page 692: cols. 1-2 last para. and page 693 para. 1.

Allowable Subject Matter

3. **Claims 11-12** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
